& Apache

experience

- since 2014 **VIO Media AS** Co-Founder, Tech Lead
• Built the core platform that now powers Vio Media AS, a VC funded startup with 8 full-time employees.
• Planned, lead and developed the entire web stack, internal & external systems, analytics, logging and tracking applications
• Key technologies were AWS, Angular 2, React, Node.js, MongoDB, Neo4j, Docker & PostgreSQL.
- 06-08 2016 **Capra Consulting AS** Summer Intern
• Delivered a full stack web application for a non-profit organization working with refugees.
• Developed both frontend, backend, database, infrastructure & deployment pipeline.
• Key technologies were AWS, React, Redux, Node.js & PostgreSQL.
- 06-08 2015 **HG Datapartner AS** Summer Intern
• Worked as a consultant for an accountant/IT firm, managing customers transition to new and upgraded systems.
• Upgraded internal server infrastructure & introduced new customers to Exchange/Microsoft/Microsoft Dynamic NAV.

education

- since 2012 **MSc. in Computer Science** Norwegian University Of Science And Technology
Specialization in Databases and Search
- 2010 **Exchange Student** Davison High School
Skipped a year of Norwegian High School and took part in an exchange program to USA. Graduated as a Senior in 2010, returned and graduated as a senior in Norway in 2011.

organizations

- since 2012 **Abakus Student Union** accountant, developer
Volunteered as an accountant until 2014, in the later years I have joined a group of developers where I work on applications which are in active use by the student population.
- 2014 **itDagene** event planner, banquet
Was in charge of planning & hosting a banquet to introduce students to companies/businesses who would like to meet, greet & introduce them self.

projects

- since 2015 **AbaCash** abacash.abakus.no
In charge of developing & maintaining AbaCash - a decentralized cashless payment solution, utilizing RFID cards to enable students to buy food & drinks.
