programming

Advanced

Shell • JavaScript • CSS

Intermediate

Swift • Python • C • Mat-lab • cypher • SQL • Java

Familiar

Go • PHP • C#

web technologies

AngularJS 1/2, React, webpack, Node.js, express, HTML/Jade/EJS, Sequelize, mongoose, CSS/Sass/Less/Stylus, Django & Grunt/Gulp

database technologies

MongoDB, PostgreSQL, Redis, MySQL, Neo4j, Elasticsearch, Firebase, OrientDB, Solr, DynamoDB & riak

other technologies

AWS, Docker, git, Kubernetes, Nginx & Apache

Computer Science student from Norway, interested in databases, web infrastructure and JavaScript frameworks. Active in the startup scene, avid programmer with a passion for building technology from the ground up.

experience

- since 2014 **VIO Media AS** Co-Founder & Tech Lead
Built the core platform that now powers Vio Media AS, a VC funded startup with 8 full-time employees. Planned, lead and developed the entire web stack, infrastructure, servers, analytics, logging and tracking applications.
Key technologies: AWS, Angular 2, React, Node.js, MongoDB, Neo4j, Docker & PostgreSQL.
- 06-08 2016 **Capra Consulting AS** Summer Intern
Created a full stack web application for a non-profit organization working with refugees. Developed frontend, backend, database, infrastructure & deployment pipeline.
Key technologies: AWS, React, Redux, Node.js & PostgreSQL.
- 06-08 2015 **HG Datapartner AS** Summer Intern
Worked as a consultant for an accountant/IT firm, managing customers transitions and upgrading internal server infrastructure.

education

- since 2012 **MSc. in Computer Science** Norwegian University Of Science And Technology
Specialization in Databases and Search
- 2010 **High School & Exchange Student** Davison High School
Completed Norwegian High School while taking part in an exchange program to USA.

volunteering

- since 2012 **Abakus Student Union** Accountant & Developer
Volunteered as an accountant until 2014, in the last years I joined a group of developers where I create applications which are in active use by the student population.
- 2014 **itDagene** Event planner
Was in charge of planning & hosting a banquet to introduce students to companies/businesses who would like to meet, greet & introduce themselves.

projects

- since 2015 **AbaCash**
In charge of developing & maintaining AbaCash - a decentralized cashless payment solution, utilizing RFID cards to enable students to buy food & drinks.
